The essential release agents-spray gun

The SCHÜTZE FINE-SPRAY gun W 3 FZ-Duo is designed specially to handle sprayable fluids of very low viscosities. Fine co-ordination of precision made nozzle, needle and aircap produce an atomizing result which particularly when applying release agents gives an extreme smooth lay on in moulds and dies.

In accordance to latest regulations, release agents free of CFC will only be allowed. These agents provide a smooth finish of fine droplets to the surface, when applied with this gun.

Worldwide this very handy gun is most popular within the field of thermoplastic industries and the founding industries.

The short gun body and the Duo-feed hose, which passes fluid as well as atomizing air through the grip, allows always **comfortable handling**.

Depending on viscosity and lay on desired there are nozzle dimensions available as under:

- 0,2; 0,3; 0,5; 0,8; 1,0; 1,2; 1,5 mm
(nozzle and needle made from stainless steel)
- different nozzle extensions available
- aircaps for different spray angles available
- Duo-feed hose in all lengths
- further versions on request
- also available in HVLP-technique and version „KLS“ for application of adhesives

Technical data

weight	approx. 240 g
air consumption	approx. 90 ltr./min. (at 3 bar and 0,5 mm nozzle)
max. material pressure	4 bar
max. atomising air pressure	6 bar
gun body	aluminium
nozzle and needle	stainless steel

Special designs on request.
Technical alterations reserved.
