schütze

Now also available in "HVLP"-version (reduced overspray)

Designed specially to spray fluids of low viscosities, f.i. release agents or oils, in finest droplets with reduced overspray.

The W 3 FZ-Duo/HVLP is the optimum result of our successful co-operation with users and release agents manufacturers.

Also existing sprayguns of series W 3 FZ-Duo can be equipped subsequently to the HVLP-version without any problems. Only a different nozzle and aircap are necessary. All other parts are identically to the standard series. No further spareparts are needed.

The same weight and measurements allows the same uses as the standard series.

- available nozzle sizes:
0,3 / 0,5 / 0,8 mm Ø
(nozzle and needle made from stainless steel)
- low weight and measurements allows always comfortable handling
- aircaps for different sprayangles available
(flatspray 60° or roundspray 15°)
- weight only 240 g
- HVLP-version refitable
- Duo-hose in all lengths available

Technical data:

material pressure:	max. 4 bar
atomizing air pressure:	max. 6 bar
weight:	approx. 240 g
gun body:	aluminium, anodized
nozzle and needle:	stainless steel

Special designs on request.
Technical alterations reserved.
